ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite): **A review of U.S.G.S. topographic map, aerial photos and National Wetland Inventory maps indicates the wetland basin is isolated with no apparent surface water connection to downgradient jurisdictional waters of the U.S. A review of the available information indicates there is no apparent or likely interstate commerce nexus associated with this isolated basin.**
